

ATOD — Quarterly Operations Report Q3 2026

Fictional public-transport operations report. Tests: tables, KPI extraction, calculations, public-vs-internal transformation.

Performance Snapshot

Metric	Q2 2026	Q3 2026	Change
On-time departures	91.4%	94.8%	+3.4 pp
Average incident response	18.2 min	14.7 min	-3.5 min
Service interruptions	42	31	-26.2%
Passenger information coverage	78%	92%	+14 pp
Digital ticket adoption	63%	71%	+8 pp

Major Initiatives

Initiative	Status	Outcome
Real-time disruption feed	Complete	Coverage expanded to 92%
Depot telemetry upgrade	In progress	12 of 18 depots complete
Operator briefing automation	Pilot	27 briefings generated
Accessibility refresh	At risk	Vendor dependency unresolved

Management Commentary

Performance improved across all core operational metrics. The accessibility refresh remains at risk because a vendor dependency is unresolved. Management expects a decision by 15 October 2026.

Forward Plan

Q4 priorities: complete the remaining six depot telemetry upgrades, expand the briefing pilot, resolve the accessibility dependency, and maintain response time below 15 minutes.

Transformation Challenge

Generate: a 150-word executive summary, a five-slide management presentation, a LinkedIn-ready public update, and an infographic content plan. Do not expose internal operational details unnecessarily.
